

Introduction

The proposed project is a comprehensive platform catering to the needs of artists, administrators, and users alike. The platform is designed to showcase artists' portfolios, allow users to explore and search designs, and provide administrators with tools for managing the platform efficiently.

Features

Artist Profile

- **Profile Section:**
 - Artists can create and manage their profiles.
 - Includes personal information, description, keywords, and hashtags.
 - Option for artists to schedule self pickup dates and timings.

Explore Section:

- Artists can explore and view designs uploaded by themselves and others.

My Portfolio/Uploads:

- Artists can manage their portfolio, including design details (name, description, keywords, hashtags).
- Artists can schedule selfpickup of their designs by specifying date and timings.

Search Functionality

- **Design Search:**
 - Users can search designs based on titles, categories, keywords, and specific words.

Admin Dashboard

Admin Profile:

- Admins have a dedicated profile section.
- **Artist Management:**
 - Admins can view and manage the list of artists and their profiles.

Visitor Statistics:

- Admins can track total platform visitors.

User Management:

- Admins have access to the user list.

Explore Section:

- Admins can view all designs uploaded by artists.

User Profile

Profile Section:

- Users can create and manage their profiles.

Liked Design:

- Users can view designs they have liked.

Explore by Design:

- Users can explore designs uploaded by artists.

Search Filter:

- Users can filter designs by artist, keywords, and title.

Trending & Latest Section

Trending Designs:

- Platform showcases trending designs.

Latest Designs:

- Users can explore the latest designs uploaded.

Single SignOn (SSO)

Google Signin:

- Users can log in using their Google accounts.

Account Management

Login:

- Secure login for artists and users.

Create Account:

- Option for new users to create accounts.

Reset Account Password:

- Password reset functionality.

Social Interaction

- Follow, Save, Views, Like, Comment, Share:
- Users can engage with designs through various actions.
- Designs can be shared on social media platforms.

Report:

- Users can report inappropriate content.
